# 1 Grade

**Files to submit:**

- grade/grade.c

**Main function:** none

**Authorized functions:** You are only allowed to use the following functions:

- puts(3)

**Authorized headers:** You are only allowed to use the functions defined in the following headers:

- errno.h
- assert.h
- err.h
- stddef.h

## 1.1 Goal

Write a function that displays a message (using `puts`) corresponding to the grade given as a parameter (represented by a `char`):

- If the grade is 'A', the program should display "Excellent" followed by a newline.
- If the grade is 'B', the program should display "Good" followed by a newline.
- If the grade is 'C', the program should display "Not so bad" followed by a newline.
- If the grade is 'D', the program should display "Could be worse" followed by a newline.
- If the grade is 'E', the program should display "Maybe next time" followed by a newline.
- If the grade is 'F', the program should display "No comment" followed by a newline.
- If the grade is not one of the previous letter, the program should display "Call a wild ACU" followed by a newline.

**Note:** You **must** use a `switch` for this exercise.

```
void grade(char g);
```

*It is my job to make sure you do yours.*
