1 my_strcmp

Files to submit:

- my_strcmp/my_strcmp.h
- my_strcmp/my_strcmp.c

Authorized headers: You are only allowed to use the functions defined in the following headers:

- stddef.h
- assert.h
- err.h
- errno.h

1.1 Goal

Write a function which have the same behavior as the `strcmp(3)` function described in the section 3 of man. Concerning the return value, as long as the value is inferior, equal or superior to zero respectively, the actual value does not matter.

```
int my_strcmp(const char *s1, const char *s2);
```

Note that null pointers won't be tested and you only have to handle ASCII characters from 0 to 127.

It is my job to make sure you do yours.
