1 Trailing whitespaces with sed

Files to submit:

- sed_trailing_whitespaces/whitespaces.sed

1.1 Goal

The goal of this exercise is to write a `sed` script that will remove trailing whitespaces in your file. Your `sed` script will be used the following way:

```
42sh$ sed -i -Ef whitespaces.sed <file>
```

As you can deduce from the example, the flag `-E` is used for the extended regex.

1.2 Example

```
42sh$ cat -e test.txt
hello $
This is a $
Test $
Ok?$
42sh$ sed -i -Ef whitespaces.sed test.txt
42sh$ cat -e test.txt
hello$
This is a$
Test$
Ok?$
```

It is my job to make sure you do yours.
