1 My memcpy

Files to submit:

- my_memcpy/my_memcpy.c
- my_memcpy/my_memcpy.h

Authorized headers: You are only allowed to use the functions defined in the following headers:

- err.h
- errno.h
- stddef.h
- assert.h

1.1 Goal

You must implement the following `my_memcpy` function:

```
void *my_memcpy(void *dest, const void *source, size_t num);
```

This function must have the same behavior as the `memcpy(3)` function described in the third section of the man. It means that your function has to copy `num` byte from `source` to `dest`. You do not have to handle `NULL` parameters.

It is my job to make sure you do yours.
