Contents

---

1 Hello Makefile!

Files to submit:

- hello_makefile/Makefile

1.1 Goal

You must write a `Makefile` which must respect the following requirements:

- It must define a `GREETING` variable with a value of `Hello World!`.
- It must define a default `all` recipe which calls the `hello` recipe and prints `Hello again`.
- It must define a `hello` recipe which prints the content of the `GREETING` variable.

> **Tips**
>
> You can silence commands in a `make` recipe using an `@` at the start of the line of the command, after the tabulation.

1.2 Example

```
42sh$ ls
Makefile
42sh$ make hello
Hello World!
42sh$ make
Hello World!
Hello again
42sh$ make all
Hello World!
Hello again
42sh$ make hello GREETING="Greetings"
Greetings
42sh$ make GREETING="Hey!"
Hey!
Hello again
```

It is my job to make sure you do yours.
